

Terms and Conditions—Commercial Air Conditioning Program

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2010**.

Equipment and Installation Eligibility Requirements:

1. All air conditioners must be ENERGY STAR labeled and meet current Energy-Efficiency Criteria for ENERGY STAR qualified air conditioners. Current ENERGY STAR Information, specifications and qualifying equipment list can be found at: <http://www.energystar.gov>.
2. As of 1/1/2010 the following energy efficiency minimums shall be required to receive a rebate:

MINIMUM Energy-Efficiency Criteria for ENERGY STAR® Qualified Air Conditioners (effective 1/1/10)		
Product Type	SEER	EER
Central Air Split Systems	14.5	12.0
Single Package Air Conditioner	14	11.0

MINIMUM Energy-Efficiency Criteria for ENERGY STAR® Qualified Light Commercial Heat Pumps (effective 5/1/10)		
Product Type	SEER	EER
Split System (3-phase) <65,000 Btuh	14.0	12.0
Single Package (3-phase) <65,000 Btuh	14.0	11.0
All Air Conditioners ≥65,000 and <240,000 Btuh w/ electric resistance or no heating	11.8 IEER	11.7
All other	11.6 IEER	11.5

3. The minimum efficiencies shown on this form are values required for ENERGY STAR qualified equipment at the time this form was published. The Customer is responsible to ensure that their system meets the current ENERGY STAR criteria in effect at the time of installation.
4. When installing a split system, both a new outdoor unit (condenser) and a new indoor A-coil (evaporator) must be installed.
5. Rebates for air conditioners are based on cooling tons. The capacity for units is rated in the *AHRI Unitary Directory* by its output in "Btuh". This amount must be divided by 12,000 to determine the number of tons.
6. Single package units (compressor/blower combination unit) must utilize electricity as the source of heating. These units are often installed on a slab or roof and are not common in residential applications.

IMPORTANT NOTE: Energy Star labels on equipment do not guarantee that products qualify for this incentive (Refer to requirements 1-3 above).

Application and Eligibility Process

The Utility reserves the right to verify sales transactions and to have reasonable access to the customer's facility to inspect pre-existing equipment (if applicable) and the Energy-Efficient Measures installed under this Program, either prior to issuing incentives or at a later time.

An invoice is required and must include specific customer information, including, but not limited to the type, size, make/model, serial number and date of purchase of Energy-Efficient Measures. An authorized representative of the Participating Customer must sign, date, and submit the application with the invoice and manufacturer's equipment performance sheets.

The Participating Customer must ultimately own the equipment, either through an up-front purchase or at the end of a short-term lease. Equipment procured by customers through another program offered by the Utility may not be eligible for a rebate through this Program.

Warranty Information:

The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability:

Participating Customers agree that the Utility's liability, in connection with this Program, is limited to paying the Program Incentive specified (when all Terms and Conditions have been satisfied by the customer). Under no circumstances shall the Utility be liable for any consequential or incidental damages resulting from participation in this Program. The Utility will not be responsible for any tax liability that may be imposed on the customer as a result of the payment of Program Incentives.

Participating Customer's Certification:

Participating Customer certifies that he/she purchased and installed the equipment listed in their application at their defined location served by the Utility. Participating Customer agrees that all information is true and that he/she has conformed to all of the program and equipment requirements listed in the application.

Program Changes/Termination:

While this rebate program will be in effect for an indefinite period, the Utility reserves the right to extend, modify (this includes incentive levels) or terminate this Program without prior or further notice. The customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Other Conditions

The Utility reserves the right to inspect installations before issuing the rebate. If the application does not comply with the Utility's rules and qualifications, the rebate amount may be adjusted.

Customers must apply for rebates within 6 months of the purchase date (as shown on the customer's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
