## **DUAL FUEL HEAT RATE PROGRAM**

The dual fuel heat rate program applies to members with approved electric space heating equipment.

- The primary heating system must be electric and metered separately.
- The primary electric heating source must operate first, with the backup system operating only when the primary system is unable to satisfy the indoor thermostat setting.
- This rate has a requirement to sign a Dual Fuel Agreement to allow us to possibly control the load for no more than 400 hours per season.
- A premium electric water heater must be installed and provide 100% of the domestic water heating for the home.
- The space heated by the primary electric system must be an area of 400 square feet or more.
- This has a rebate in the amount of \$100, but does not apply to heat pumps.
