

T.I.P. Rural Electric Cooperative

A Touchstone Energy® Cooperative 

Wind and Solar Policies and Procedures

1. Fill out application form and pay appropriate application fee.
2. Sign the form- *“Agreement for Electric Service for Qualifying Co-generation and/or Small Power Production Facilities”*.
3. Show proof of insurance as prescribed in the *“Agreement for Electric Service for Qualifying Co-generation and/or Small Power Production Facilities”*. section B part i.
4. The interconnection shall be provided with a switch that provides a visible break or opening. The switch shall be capable of being padlocked in the open position.
5. T.I.P. would like you to install a meter base for the distributed generation to register KWH's for the distributed generation only. (This meter is at no cost to you and is for informational purposes only).
6. If you want to sell KWH's back to TIP/CIPCO, a bi-directional meter needs to be installed where your main meter is now.
7. The unit cannot be interconnecting with T.I.P. Rural Electric Cooperatives lines until all paper work is completed and unit and wiring is inspected.
